MICROFRICTION®

Introducing the Most Advanced Pushback System

The Microfriction® pushback system is the result of years of research by a team of seasoned industry specialists and engineers. It is designed to meet the demand for a superior product built to the best industry standards and is reliable, safe and easy to use. In essence, the Microfriction® pushback is the best storage system available today.

At the heart of Microfriction® is a V-shaped wheel gliding on a diamond-shaped rail that minimizes friction and facilitates cart movement. Watch how the wheels glide into

motion and you'll be convinced of the incomparable superiority of the Microfriction® pushback storage system.

Thanks to the unique shape of its wheel and rail, the Microfriction® pushback will not accumulate debris causing cart blockages that are common to other pushback systems.

Simply put, Microfriction® is the most advanced, leading-edge storage system ever built and it comes with the best warranty in the industry!

CONVENTIONAL RACKING

STORE UP TO 6 PALLETS ON THE SAME AISLE
MAXIMIZE YOUR STORAGE SPACE

Standing Out from the Pack

With the Microfriction® pushback system, reap the benefits of optimized warehouse storage capacity. With up to 70% increase in your storage capacity compared to conventional rackings, Microfriction® is an immediate and guaranteed return on your investment. Rethink your storage area and make a smart choice.
